ACCESS

XXI century globalization, the process of labor resources international at the level of the advance was dramatically expanded. Developed countries of the economy sustlashtirayotgan demographic crisis and qualified personnel shortage (Fachkräftemangel) developing countries and representatives for new opportunities to the door opening. This process in Germany, Austria and SWITZERLANDas the German language so‘zlashuvchi countries own sustainable economy, high social protection system and strong industrial potential with separated is.

However, this country is in a successful business doing for not only professional ko‘are nikma, but a high level of German language knowledge is also necessary. The English language is the global business language as the recognition obtained toe‘lsa, although the cottages (Deutschland, Austria, Confoederatio Helvetica) region local labour market is fully integrated for German language solution, the factor is. This article is in German the language of the global labor market o‘rni, in particular, the strategic importance have , which is it, engineering and medicine in the fields of the role of scientific aspects of the analysis is.

The results of research of the actual way, Uzbekistan and Central Asian countries to europe labour migration flow to strengthen and growing to a at the time, the potential of the specialist language training level of their future determine the will. Ko‘p in cases of highly qualified specialists in the language not knowing because of their profession on the work of a possibility deprived of being condition is observed. For this reason, the German language professional significance o‘rga to not only linguistics, but also economic and pedagogy an view point is also important.

Germany, Austria and SWITZERLAND europe's most rich and economic aspects from the stable state is. These three countries total Gdp (Gross Domestic Product) , ko‘rsatkich of the european Union economy, a significant part constitute a will.

Germany is Europe's most major economies to become, industrial, automotive and chemical technologies is leading. Austria service to and tourism field, SWITZERLAND while the finance, pharmaceutical and high technology in the field of the world's leading position it occupies. This country far central monthly job the right of developing countries with compared quite high. For example, in germany for central brutto work pay 4000 euros around is, in SWITZERLAND this indicator 6000-7000 the swiss franc will reach.

Statistical data ko'ra, germany in 2023-year position according to, 2 million more vacancies blank left. This condition is mainly the population aging and retirement age who have reached specialists the who click a young personnel lack with associated. For this reason, the government "Qualified refugee 'tog'ri the law" (Fachkräfteeinwanderungsgesetz) and recently introduced the "Opportunities card" (Chancenkarte) - like programs to work will fall. These programs foreign workers to job search for the visa grant facilitates, but the main condition from one this language is knowing the extent of it is.

The cottages in the region of permanent residence certificate (Niederlassungserlaubnis) get to the German language level required is. Usually, B1 level is a minimum requirement is not, although they qualified job location for B2 or C1 level required is. For example, in germany "Ko'k card" (mavi kart) owner to be for higher information of the degree and the work of the invitation enough to be can, but daily life and in the community when working with the language, not to know deafera of growth impede you will.

German is the language of labor in the market o'rni each of a field to be different is, although three main directions: IT, Engineering , and Medicine, its role in addressing working in is.

Germany "engineers in the country" as it is known. Siemens, zodiac sign, bmw, volkswagen , like the giants' world toe'y lab their branch - able is, although their research and developments (r&d) centers mainly German - language works.

Technical hujjatlashtirish: Engineering projects in safety standards (DIN standard) German in the language referred to. Drawings, technical specifications and reports understand to special terminology, a base having toe'lish must.

Work production process: in the plant with the workers and the management o'in rtasi of communication of the German language out carried. Security technique to toe'citizens the instructions to understand the unfortunate event out come you can.

Career opportunities: Engineering in the field of primary level to the work access for B2 level enough toe'of lish can be, but project leader (project manager) or department head of the post to rise for C1 level and business German language (Wirtschaftsdeutsch) knowledge required is.

DOG of the area is the traditional basis for the English language into most ko'p that rely on the area is. Berlin, Munich and Hamburg like cities in startup work environment , ko'pinch the English language will be. However, this all DOG vacancies apply do not.

Traditional corporations: RECORDS, deutsche bank or Siemens like large German corporations in internal systems and clients with work to German language require will. Programmers only code may write, but the customer (klient) with the requirements discussed be should.

The state sector and E-Government: in germany digitization the process of state agencies in the German language taken are. For this reason, the state of the order on running IT companies in the German language who know specialists prefer ko'radi.

Integration: IT professionals for either A2 or B1 level of society methodology'to shib and personal problems to solve to for is necessary. The language you know not into the insulator out coming and work productivity on the negative effect ko'to be rsat can.

Medical industry in German language to the requirements of the most strictly to present direction. This is directly from human life and safety with associated the fact that by is caused.

Language certification: Foreign fifty doctors in Germany to work on the right to get to the special "medicine of the German language" exam (Fachsprachprüfung) to have. This exam C1 level equivalent. The doctor and the patient with clear, understandable and empathy with talking be you should.

Documentation and Diagnostics: Disease history (Anamnese), recipes and diagnostic conclusions of the German language is referred to. Note that to understand the patient's health in serious damage inflict can.

Central medical staff: Nurses (Pflegefachkraft) for also B2 level required is. The population is aging due to in Germany the nurse to present the demand is very high, but the language block, this area also is observed.

Austria and SWITZERLAND difference: in Austria medical diploma recognition obtaining process is slightly more complicated to of which can be, in SWITZERLAND while many of the language (German, French, Italian) require which areas there are, but the German language advantage makes.

German language to the labor in the market, applying in the process of a number of difficulties there are. This part this is to compress and them overcome the ways of the analysis is.

Foreign diplomas Germany or in Austria recognized to be a complex process. For professionals in their profession on to work for additional courses pass or exam submit need to will. This process in the German language, knowing the level of the solution of the role to play. For example, engineering diploma recognition get to technical German language - to citizens of the tests to be submitted can.

German work culture is clearly planning, punctuality and to the communication is based on. The language knowing not only grammar, but also cultural codes and provides to understand. For example, work in the place "Paris"

(you) and "Du" (you) from the form when in use, assembly fights of how the idea to express as subtle ways the German language through o'medicine. The language do not know the culture to'qnashuvlarga (Kultura Shock) out coming and from work to be laid off the risk posed to be can.

The German "Dual education" (Dual Ausbildung) system in the world unique is. This system , students theory in school, the practice while in the directory o'shall rga. This program entry for at least b1/b2 level required is. This is either a'1 through to read graduated young people work , allowing you to by high price and work to place a guarantee of almost 100% is. O'from young people for this direction , the most effective migration of the methods one is.

Global economy o'zgarib review and the european Union 's green energy transition strategy (Green Deal) new occupations of the emergence to lead has. The following trends in the next 5-10 years in the German language importance of increase is expected to:

1. Digital transformative: Industry 4.0 (Industry 4.0) in the framework of the smart factory is developing. This , while traditional engineering from programming and German language together to know require will.
2. In medicine digitization: Electronic health to maintain the system the introduction be on the medical staff of computer literacy with along the German - language terminology that deep to know require will.
3. Migration policy liberallashuvi: Germany government in the coming years, the quota increase are planning to. This o'from time - to expert for a wide opportunity gives, but the competition also will intensify. Language knowledge competitiveness as the main factor to toe'become and remain.

Specialists recommendations:

- Early start: German language o'rga to professional choosing before or parallel in the start to the goal according.
- Area of specialization: General German language (Allgemeindeutsch) with , together, professional German language (Fachdeutsch) of course o'tash needed.

For example, "DOG , for German language" or "medicine of the German language".

-Practice: the language only in the course of , not the real environment (podcasters, professional forums, internship) methodology 'to llab you need.

-Official certificate get: Higher Institute, Telc or TestDaF as international recognition obtained certificates work allowing for reliable evidence is.

SUMMARY

Conclusion I say, the German language global labor market, in particular, of Europe's most developed economy able to present COTTAGES in the region of the success the key is. IT, engineering , and medicine , such as strategic areas in the German language knowledge is not only to work access for, but also professional o'sish, security and social integration for also necessary necessity.

Germany, Austria and SWITZERLAND in personnel shortage problem O'the republic of uzbekistan , such as demographic potential high where countries for the unique opportunity. However, these opportunities for effective use for systematic language training, professional qualifications , approval and cultural integration to the process of serious approach should be. The German language is simply a foreign language is not, but Europe standard life style and high - income profession to master is the means. In the future, this language is deep o'medicine who are specialists in the global labor market competitiveness further increase is no doubt.

Interstate cooperation and development, language center methodology 'llab support and vocational education German standards to adapt through labour migration more effective and safe up to can.
